Also, Spraying Harrows, Hay Rakes, Cultivators, Corn Planters, Shellers, etc. Mention this paper.

HENCH & DROMGOLD, Erie, Pa.

A MODERN NAVAL BATTLE.

The Spectacle Is a Grand One and the Experience Thrilling.

A layman has no conception of the awful nature of battle in modern naval vessels. Even the cruisers have steel sides, and the air of the inclosed spaces is very confined. The din made by the impact of a heavy projectile against these metal sides is awful beyond description. I wore cotton in my ears, but in spite of that, am still deaf from that cause. The engineers in the Chen-Yuen stuck to their work even when the temperature of the engine room was above 200 degrees F. The skin of their hands and arms was actually roasted off, and every man was blinded for life, the sight being actually seared out.

Late in the action, after my hair had been burned off and my eyes so impaired by injected blood that I could only see out of one of them, and then only by lifting the lid with my fingers, I was desirous of seeing how the enemy was delivering his fire. As I groped my way around the protected deck a hundred pound shell pierced the armor about 18 inches in front of my hand. In a second my hand touching the steel was so burned that part of the skin was left upon the armor. That shows how intense is the heat engendered by the impact of a shot and how rapidly the steel conducts that heat.

One shell struck an open gun shield of the Chen-Yuen early in the action, and glancing thence passed through the open port. Seven gunners were killed and 15 wounded by that shot. Early in the fight the maxim gun in our foretop was silenced. The holes pierced by a shell could be seen from the deck. After the fight we found the officer and men on duty there all dead and frightfully mangled. That one shell had wrought the havoc.

The detonations of the heavy cannon and the impact of hostile projectiles produce concussions that actually rend the clothing off. The Chinese soldiers deserve all credit for their courage and obedience in that action. No duty was too difficult or dangerous. When the Chen-Yuen's forecastle was ablaze from Jap shells, I ordered several officers to cross the shell swept place to fight the fire. They shirked that duty, but when I called upon the men to volunteer to follow me they did it promptly, and the ship was saved. It was while on this duty that a shell passing between my legs threw me aloft and let me down upon the deck with such violence that I became unconscious and was out of the fight. All of the officers, however, were not cowards. On my ship were several who had been educated in this country, and they were as brave and devoted as men could be. Others, however, were in the safest place they could find amidst ships.—Captain McGiffin in Mail and Express.

Incandescent Lamp Cleaner.

Many people blame the central station for the poor light from their incandescent lamps, when the fault is really their own. They allow their lamps to get dirty. It has been shown that one day's accumulation of dust on incandescent bulbs cuts off 5 per cent of the light, so the result of a few days' neglect can easily be guessed. As a means of removing to a great extent the frequent complaints of poor light a central station recommends the use of a lamp cleaner which greatly facilitates the process of dusting the bulbs. To a 3 foot handle is attached a strong wire frame-work, which carries a number of felt mittens. By forcing the frame over each lamp and giving the handle a few turns the dust on the glass is removed, leaving the bulb as clean as when it left the factory. Each cleaner is provided with a set of rubber friction pads that will, when suitably placed on the mittens, remove and replace burned out lamps. The handle can be extended so as to reach lamps at any distance. This device makes the cleaning of lamps a very quick and easy task.—St. Louis Globe-Democrat.

Regret That Came Too Late.

The London Musical Herald tells a queer story about Jack Wilson's tomb in the Little Cloisters at Westminster abbey. Wilson was Shakespeare's tenor. He was probably the first to sing "Sigh No More, Ladies," and he died at the age of 78, in 1673. The inscription on his tomb at the abbey was much obliterated, and under the direction of an antiquary a man was employed to recut the letters. The antiquary stood looking over him, so that he should make no mistake, and to make the time go pleasantly he expatiated at great length to the workman upon the grandeur and merits of the deceased. The man eventually stopped his work, and looking up at the antiquary said, "I wish, sir, we had known that he was such a swell before we run that there drain pipe through him."

A Very Honest View.

The young man whose salary wasn't long enough by several lengths to reach to all the points he wanted it to had been harassed that morning by numerous persons with bills and bills and bills. About noon, at which time he had lost count of them, his landlady's husband appeared with another for the past month's provender.

"What's this?" he asked, displaying considerable annoyance.

"Your board bill for the month."

"Well, I'll not pay it," he exclaimed, throwing it on his desk. "Do you people think I have no use for money except to pay bills with?" and he invited the caller to get out.—Detroit Free Press.

Woolens.

Never put away for the summer a woolen garment of any kind that is spotted with grease or soiled with mud. Grease is astonishingly attractive to moths, and all the unbrushed clothes "age" rapidly. Ammonia for all black goods, and a delicate mixture of ether, ammonia and castile soap for colored ones, may be advised.—Philadelphia Ledger.

IT WILL SELL AT 200

A Stock Now Selling at 40.
A TALK WITH THE PRESIDENT OF THE STANDARD CHEMICAL COMPANY.

Profits and Future Value of the Stock
THE PRICE SHORTLY TO BE ADVANCED TO 60.

What the New York Papers Say About It.

LEADING FINANCIAL JOURNALS WARN ALERT INVESTORS AND SPECULATORS TO BUY NOW BEFORE THE GREAT RISE COMMENCES.

"Why do you offer your stock at so low a price?" inquired a banker during the course of a conversation with Mr. Dunn, the President of the Standard Chemical Company.

"In order to have the stock quickly taken," Mr. Dunn answered. "The immediate enlargement of our business is of more consequence than slow sales of stock at higher figures."

"We have orders in hand to keep the factory and laboratories running for the next six months. We will manufacture on a large scale and offer our stock at \$40 per share in order to do this without delay."

"We want to increase the number of our stockholders throughout the country for this reason, viz: A person owning the stock will call the attention of physicians, druggists, and the people in his neighborhood to our product, and help the sales more than hundreds of dollars spent in newspaper advertising in that particular locality. A stockholder can act as agent or have someone else appointed. Everywhere that Quikline is introduced the sales steadily increase. It has the solid endorsements of over seven thousand physicians to back it."

"I advise my personal friends to buy Standard Chemical Stock at 40, and hold it for a large advance, because it is a safe investment and I know what I am talking about."

"The buyers of our treasury stock have already received dividends amounting to one hundred and fifty per cent."

"The stock is intrinsically worth par to-day."

"It will sell at \$300."

"None of the large holders will sell their stock at any price. The only stock that can be bought is in the company's treasury. When that is sold the great rise starts."

"I predict that the stock will sell at 200, because it will pay at least 20 per cent on its par value of 100."

"As the earnings have been steadily increasing while the drug has been limited to the use of a few thousand physicians, the profits of the company must be enormous as soon as the public become familiar with it."

"It is said that it took about four years to introduce antipyrine, when suddenly the demand became so great for this drug that the discoverer, according to the official organ of the State Board of Health of Pennsylvania made a million dollars in a year from his royalties alone, independent of the immense profit made by the manufacturers."

"The Chicago Tribune claims: 'The passage of the Free Quinine Bill has saved to the consumers of quinine in the United States not less than \$50,000,000 in the eight years last past.'"

"Net earnings of only \$300,000 per year pays 50 per cent. dividends on Standard Chemical stock costing \$40."

"It is simply a question of making Quikline known to the public, and the profits will soon double these figures. Look at the fortunes made by makers of patent medicines which, compared with Quikline, are as an old fashioned blunderbuss to a modern repeating rifle. Quikline is the most valuable medicine in the world to-day. The Standard Chemical Co. will establish an agency in every county in the United States."

"Equitable Life Assurance stock was sold at a low price. By increasing the number of agents year after year, the stock is worth now \$3,000 a share, and they have assets of one hundred million dollars."

"Brokers tell me that the original Edison Electric stock was very hard to sell at 45, and yet inside of a year it rose to \$3,000 per share. They had about the same experience with the Bell Telephone stock."

"Investors seldom have an opportunity to buy a gilt edge industrial stock at a low price, and so share in the immense profits of development; they generally have to buy at par and be content with small dividends of 6 or 8 per cent a year."—New York World.

A word or two about the men at the head of this company may be of interest. They are well-known practical financiers and business men whose names are at once a synonym for honest, judicious management and a guarantee that any industrial enterprise in which they embark is sure to be successful.

George W. Dunn, the president, is well and favorably known as a careful, level-headed financier, a man of sterling integrity. He is the head of the banking house of G. W. Dunn & Co., 2 Wall street, and President of the Railway and Dock Construction Co. During the two years he was President of the Old Dominion Copper Co. its stock rose from 1 1/2 to 16 1/2 by his able management.

Eugene Harvey, Vice-President of the company, formerly of the banking firm of Pearce & Harvey, has for the last twelve years been resident manager of the banking house of Theo. W. Myers & Co., Drexel Building, Philadelphia.

The Secretary and Treasurer, E. A. Wilson, is an expert accountant for fifteen years with Wales & Co., Vanderbilt brokers.

R. A. B. Dayton, counsel of the company, has offices at No. 323 Broadway.

Among the large stockholders are George D. Hillyard, the prominent New York builder; S. J. Gifford, the leading insurance agent of Dunkirk, N. Y.; Howard Swinford, Esq., Richmond, Va.; Professor A. H. Young, of Hanover College, Indiana; Y. Carver, Esq., of the Canadian Pacific Railway Co.; Professor Addison Hogue, of Washington and Lee University, Lexington, Va.; J. E. Smack, of the S. S. White Dental Company, the largest manufacturers of dental goods in the world; August Jedicke, Jr., cashier of the Hanover State Bank, Hanover, Kan.; Dr. John D. Day, of Carbondale, Pa.; Dr. R. Curtis Gray, Dr. J. H. Joliffe, Dr. Hermann Prefontaine; W. A. Marshall, Esq., San Francisco; Rev. R. M. Stanbrough, West Hurley, N. Y.; Rev. Alex. Bell, Cushing, Canada; Felix Day, Esq., Cuba; Estadistica Gracia Syndicate, representing all the South American Republics, and several prominent New Yorkers who

will have seats in the Board of Directors later on.

"The physicians and druggists themselves are investing in the stock, and the indications are that the factory will be kept running day and night. Of course, they have an absolute monopoly, but the price of their product is made low enough to avert any dissatisfaction on that score."—New York Tribune.

"The general public will soon become familiar with the quick curative power and low price of Quikline, the new drug manufactured exclusively by the Standard Chemical Company. Heretofore it has been introduced strictly and only to the physicians, but it is an article of such imperative necessity in every household, the Company will make its superior merits known immediately, and publish instructions how to cure diarrhea, dysentery, summer complaints, etc., by such eminent physicians as Chloebster, Washburn, Bennett, Eisenberg, Burgtorf, and many others. Its marvelous power in curing the various fevers—scarlet, typhoid, typhus, malaria, etc.—is certified to by such recognized scientists as Drs. Stewart, Baron, Franks, Marshall, F. H. Smith, Nixon, Thomas, Reekie, Kell, and hundreds of other celebrated physicians who have used it in thousands of cases in the hospitals."

"From every part of the United States the reports are substantially the same. The quick curative power of this drug in diphtheria, dyspepsia, erysipelas, gastric trouble, scrofula, ulcers, sores, skin diseases, etc., is almost incredible until we read the endorsements of such high medical authorities as Drs. Broening, Huden, Stuart, Lyon, Hupfeld, Henning, Barnum, Watkins, Hurley, Bradshaw, Nichols, Conklin, Lord, Alban, and hosts of others who have thoroughly tested it in their practice for over four years."

"The diseases and ailments cured by this drug are too innumerable for us to mention here."

"Sore throat is cured by simply gargling a few times. All symptoms of catarrh, pharyngitis, laryngitis, etc., quickly disappear under its influence. As a surgical dressing, and in all the requisites of minor surgery, it is unsurpassed."

"When such eminent medical authorities as Drs. Miller, Welch, Harrison, Shumway, Sears, Page, Wade and Weid declare that 'Quikline is of inestimable value,' and that 'every physician in the civilized world will be glad to use it,' and 'it should be kept handy in every house,' it is certainly a foregone conclusion that the stock of the Standard Chemical Company is sure to pay large dividends and rapidly increase in value."

"It must come into general use in every household in the land, and is certainly very, very cheap when compared with the price of quinine, antipyrine, etc. The fortunate stockholders have received handsome dividends, and we learn from reliable official sources that there is another rich plum in store for the investors in this stock."—The Financial News.

"Two London banking houses offered to take all the stock the company would sell. The bid was declined, as the company preferred to offer the shares to home investors."—The Wall Street Daily News.

"We think the fluctuations in Standard Chemical stock will be pretty lively when epidemics of disease break out in this or other countries."—Financial Record.

"An industrial enterprise, such as that of the STANDARD CHEMICAL COMPANY under careful management, is capable of yielding large returns. There is one fact which is worthy of special emphasis, namely, that for the article which the company manufactures the demand has already been created. The opportunity to share in the profits of supplying it is offered to those ready to invest in a safe and remunerative enterprise."—New York Observer.

"The company's stock is a safe, sound, and profitable investment, as its business is free from the vicissitudes that affect most enterprises of a commercial or industrial nature—good or bad crops, the rise or fall of values, business depression, or prosperity, will not affect the earning power of the Standard Chemical Company's stock. It is a certainty that its business and profits will increase year after year."

"We have not in years had the pleasure of calling the attention of small investors to such a favorable opportunity of sharing in the certain profits of a solid established manufacturing business owning a monopoly and having the entire world as a market. The stock by the very nature of things cannot long be offered at this low figure, and the time is not distant when it will sell at \$200, and will be an active factor on the stock exchange."—Trade Review and Banking Journal.

The official announcement is as follows:

THE STANDARD CHEMICAL COMPANY, Manufacturers of Drugs and Chemicals. Incorporated under the Laws of the State of New Jersey. Capital Stock \$1,000,000, Divided into 10,000 Shares of \$100 each, full paid and non-assessable.

Offices: Jersey City and New York—Factory and Laboratories: Jersey City, N. J.

General Offices: 90 and 93 Broadway, New York.

To provide funds to manufacture on a larger scale 1,000 shares of stock will be sold at \$40 per share in lots of one share and upwards.

Heretofore our product has been confined to the use of a few thousand physicians.

We will now sell to the entire medical and dental profession and general public of all countries.

The whole civilized world offers a ready and eager market for the Company's product.

Estimated earnings of \$300,000 will pay 50 per cent. cash dividends per annum on the stock now offered at \$40 per share and accumulate a handsome surplus.

The stockholders have already received a large dividend on their investment, and the shares are steadily increasing in value.

There is no mortgage or bonded indebtedness on any of the company's property.

The right is reserved to advance the price without notice, and to allot only a part of the shares applied for.

Registrars of stock, MERCANTILE TRUST CO.

Non-residents can remit money for the shares by check, money order, draft or registered letter, or we send certificate by express C. O. D. Address: STANDARD CHEMICAL COMPANY, 90 & 93 Broadway, New York.

How To Use Cottolene

the new shortening, like all other things must be rightly used if you wish the best results. Never, in any recipe, use more than two-thirds as much Cottolene as you used to use of lard. Never put Cottolene in a hot pan. Put it in when cold and heat it with the pan. Be careful not to burn Cottolene. To test it, add a drop of water; if hot enough, it will pop. Cottolene, when rightly used, delights everyone. Get the genuine, sold everywhere in tins, with trade-marks—"Cottolene" and steer's head in cotton-plant wreath—on every tin. Made only by THE N. K. FAIRBANK COMPANY, ST. LOUIS AND CHICAGO.

CARPETS!

BUY YOUR CARPETS OF THE Cincinnati Installation Co.

They have them cut and made at factory on the most economical plan. See Samples at 201, Corner COMMERCE STREET and SALEM AVENUE. Doesn't take long to look, and less time to furnish Carpets.
